### SCHAEFER GMT CART

Schaefer's injection molding process gives carts superior strength and durability, and injection molding is the only process which permits fine design detail, such as the molded frontal rim.

For semi-automated collection, Schaefer's GMT Carts have been successful with the comb lift system for over 25 years. And since it does not require a lift bar or other hardware, longer cart life is guaranteed. For fully automated collection, Schaefer carts have demonstrated that they perform equally well with various grabber systems.

### APPLICATION FEATURES

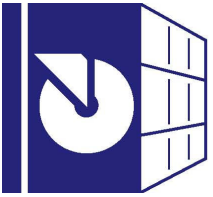

- Easy to clean
- Temperature range: -30F to + 150F
- Withstands 40mph winds when empty
- Smooth interior and exterior
- Can be labeled or hot stamped
- One piece body design
- **Stocking Charcoal -Waste, Blue-Recyclables, Green- Organics**

MODEL	120	140	240	360
