

Introducing the System 200 Boltless Industrial Shelving

Caster-Rack Systems is pleased to introduce the following System 200 Interlock Boltless shelving system.

System 200 Shelving is a heavy duty line of industrial shelving designed for maximum strength & durability. It is easily assembled in the upright position as starter and adder units, and shelves installed and adjusted without the need for nuts, bolts or special tools.

System 200 T posts are manufactured from 15 ga. Steel punched on 2" vertical increments to accept the standard compression shelf clips.

System 200 shelves are made from 19 ga. and formed with returns bends on the bottom edges to increase capacity.

System 200 use bolted "X" Braces for rear and side bracing. These are the only components that require nut & bolt fastening.

All components are compatible with the Interlok No- Bolt system Manufactured by Metalware. All components are powder coated in a high quality Olive Grey coating.

Please contact me with any inquires, questions or help with application design & specification.

Thank you,

Tony Matthews

Sales Manager, SS & MHP

Our Products include

- Casters & Wheels
- Roller conveyor components
- Parts Bin Systems
- Modular shelving systems
- Mezzanine Systems
- Rolling Ladders
- Recycling containers
- Material Handling & Laundry Carts
- Safety Storage cabinets
- Security cages
- Workbenches
- Clothes Lockers
- Pallet Rack Systems
- Stock picking carts

BOLTLESS INDUSTRIAL SHELVING

Economically Priced Heavy Duty Interlock Boltless Industrial Shelving. Designed for Maximum Strength and Durability. Quick and Easy Assembly and Rearrangement without the need of nuts and bolts or tools. Compatible with Metalware No-Bolt Interlok Shelving.

SHELVES

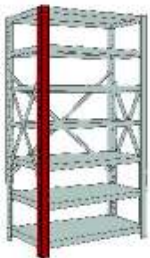

- Formed with return bend on all bottom edges for increased strength and capacity
- Manufactured in 19 ga. steel
- Punched to allow installation of shelf dividers

Part No.	Length	Width
201 1236	36"	12"
201 1248	48"	12"
201 1836	36"	18"
201 1842	42"	18"
201 1848	48"	18"
201 2436	36"	24"
201 2448	48"	24"

POSTS

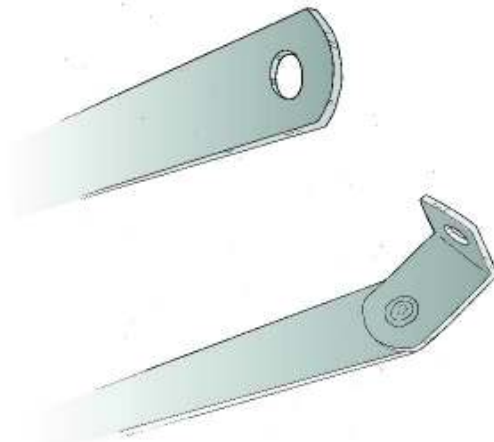

- Punched on 2" vertical increments to accept up to 2 standard compression Shelf Clips
- Allows common posting between adjacent bays of shelving
- Manufactured in 15 ga. steel

Part No.	Length
205 76	76"
205 88	88"
205 100	100"

SIDE & BACK BRACES

- Bolted "X" bracing for side and back
- Bracing on side & back maintain rigidity of units
- Braces sold in pairs

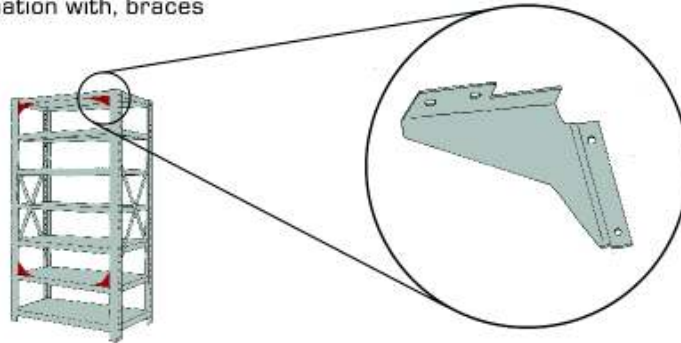

Part No.	Length
207 37	37"

Part No.	Length
208 61	61"

GUSSETS

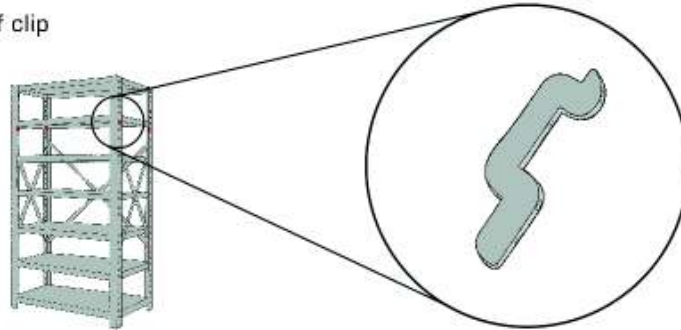

- Use when access to both sides of unit is required
- Use instead of, or in combination with, braces

Part No.
200G

SHELF CLIPS

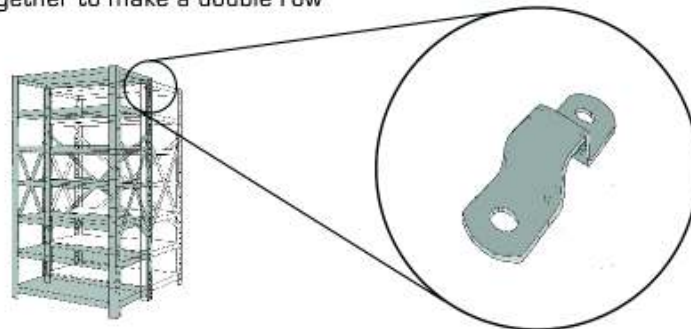

- Standard compression shelf clip

Part No.
200SC

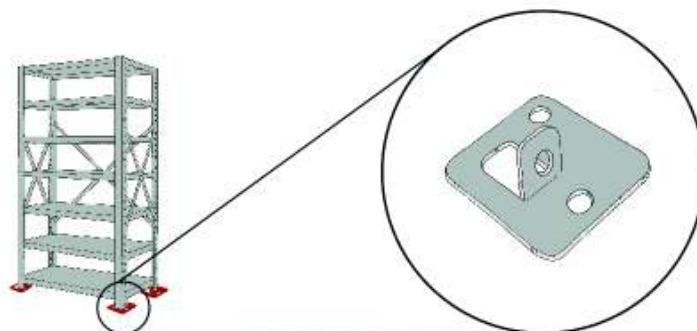

BACK TO BACK CLIP

- To join rows of shelving together to make a double row

Part No.
200BB

FOOT PLATE

Part No.
200 FP
